Zuckerman, M. B. (2012). Intimate partner violence: Women and work within an ecological framework. Dissertation Abstracts International Section A: Humanities and Social Sciences, 3510.	This dissertation examined the factors that support or hinder employment for female victims of domestic violence (DV). The ecological framework was used to organize the different levels that impact a victim's employment. Qualitative data was collected and analysed after conducting in-depth interviews with 41 voumes who were both employed explorations of the contractive with 41 voumes who were both employed employment for long periods of time due to barriers they encountered. These barriers included: www. interferences, male absence 's attitude about victim working pressures of parenting and working. Implications are discussed, including the need for increased public wareness on DV, workplace DV policies, and affordable children.					х			х		х	х
